

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (\int) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

ORDNANCE SURVEY OF ENGLAND
PARISH OF LAMARSH & D^o (*Det. Nos 1, 2 & 3*)

C^o ESSEX

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·244 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is 1½ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (J) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

ORDNANCE SURVEY OF ENGLAND

PARISH OF LAMBOURNE

C^o ESSEX

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (/) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

County Names	©	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	C.S.	Centre of Fence	C.F.
Centre of Road	C.R.	Top of Cop	T.C.
Side of Stream or Drain ...	S.S. or S.D.	Centre of Wall	C.W.
Root of Hedge	R.H.	Defaced	Def.
Face of Wall	F.W.	Track of Stream	T.S.

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

INDEX TO THE SHEETS

Published on the Scale of 1 inch = 1 mile 1861

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·244 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is 1½ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (f) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{4}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (*f*) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

ORDNANCE SURVEY OF ENGLAND

PARISH OF LANCLEY

1861

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (/) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

INDEX TO THE SHEETS

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (*/*) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

ORDNANCE SURVEY OF ENGLAND

PARISH OF HIGH LAVER

C^o ESSEX

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 0·0018 inch being equal to one acre.

The length of each sheet is 1½ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (/) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

ORDNANCE SURVEY OF ENGLAND
PARISH OF LITTLE LAVER

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·244 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 0·018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (/) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

INDEX TO THE SHEETS

Published on the Scale of 2500 or 25·344 Inches to a Mile

Scale of this Index One Inch to a Mile.

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 18 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (/) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles the area is twenty-four square miles, equal to 15,360 acres.

Following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

PARISH OF LAYER BRETON

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 10018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (*f*) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

PARISH OF LAYER DE LA HAYE & D^o (*Det*)

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·444 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (f) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

INDEX TO THE SHEETS

INDEX TO THE SHEETS

length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each therefore 960 acres.

Braces (f) on the plans are to indicate that the spaces so braced are in-
der the same reference number.

scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double number to each sheet, as VI. 9., the Roman Numerals referring to the Plans, the Arabic Figures to the Parish Plans.

Following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

descriptions of the boundaries are shown by the following initials :—

a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

INDEX TO THE SHEETS

Published on the Scale of $\frac{1}{2500}$ or 25.344 Inches to a Mile

Scale of this Index Three Inches to a Mile

EXPLANATORY REMARKS.

Scale of the Parish Plans is the 1-2500th of the actual length on the ground and is equal to 25·344 inches to a mile, which is very approximately one square inch to one acre, the square of 1·0018 inch being equal to

length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

Braces (/) on the plans are to indicate that the spaces so braced are included under the same reference number.

Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

Following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

INDEX TO THE SHEETS

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (f) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

ORDNANCE SURVEY OF ENGLAND

PARISH OF LITTLE LEIGHS

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·444 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (/) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

ORDNANCE SURVEY OF ENGLAND

PARISH OF LILSTON, DOVER DISTRICT

EXPLANATORY REMARKS.

scale of the Parish Plans is the 1-2500th of the actual length on the ground and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, is very approximately equal to one square inch to one acre, the square of an inch being equal to one acre.

Length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

Braces (/) on the plans are to indicate that the spaces so braced are under the same reference number.

Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

Dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

Following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

When a change occurs in the boundaries, the symbol [○—○] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

INDEX TO THE SHEETS

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·444 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (/) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

ORDNANCE SURVEY OF ENGLAND

PARISH OF MARKS TEY & D^o (*Det Nos 1 & 2*)

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of ·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (*f*) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

ORDNANCE SURVEY OF ENGLAND

PARISH OF MASHBURY & D^o (*Det N^{os} JR 2*)

C^o ESSEX

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of ·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{4}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (/) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

EXPLANATORY REMARKS.

Scale of the Parish Plans is the 1-2500th of the actual length on the ground and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, every approximately equal to one square inch to one acre, the square of an inch being equal to one acre.

Length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each therefore 960 acres.

Closure has a reference number to the area which is given in this Book.

Spaces (/) on the plans are to indicate that the spaces so braced are under the same reference number.

Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

Dimensions of the sheets on the Six-inch scale being four miles by six miles or twenty-four square miles, equal to 15,360 acres.

Following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

INDEX TO THE SHEETS

Published on the Scale of 2500 or 25·344 Inches to a Mile

Scale of this Index One Inch to a Mile.

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·8 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

Braces (/) on the plans are to indicate that the spaces so braced are included under the same reference number.

Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles the area is twenty-four square miles, equal to 15,360 acres.

Following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

PARISH OF MESSING & D^o (*Det. Nos 1, 2 & 3*)

C^o ESSEX

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 0·018 inch being equal to one acre.

The length of each sheet is 1½ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (/) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

ORDNANCE SURVEY OF ENGLAND

1861

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 8 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

Braces (/) on the plans are to indicate that the spaces so braced are included under the same reference number.

Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

Following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

INDEX TO THE SHEETS

Published on the Scale of 2500 or 25·344 Inches to a Mile

Scale of this Index One Inch to a Mile.

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 18 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (/) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

ORDNANCE SURVEY OF ENGLAND

PARISH OF MORETON & D^o (*Det.*)

EXPLANATORY REMARKS.

scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·844 inches to a mile, or 3·157 chains to an inch, is very approximately equal to one square inch to one acre, the square of an inch being equal to one acre.

length of each sheet is 1½ miles, and the width 1 mile, the area of each sheet therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

Braces (/) on the plans are to indicate that the spaces so braced are included under the same reference number.

Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles are twenty-four square miles, equal to 15,360 acres.

Following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

INDEX TO THE SHEETS

Published on the Scale of $\frac{1}{2500}$ or 25·344 Inches to a Mile.

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1018 inch being equal to one acre.

The length of each sheet is 1½ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (f) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

CO. ESSEX

EXPLANATORY REMARKS.

scale of the Parish Plans is the 1-2500th of the actual length on the ground and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, is very approximately equal to one square inch to one acre, the square of an inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

Braces (/) on the plans are to indicate that the spaces so braced are included under the same reference number.

Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles each sheet contains twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—
